

Boosting CBRNE Innovation in Southern CEE through Academy-Industry Collaboration

The **GROUNDUP** project aims to build a strong CBRNE innovation ecosystem in the Southern CEE region by connecting students, researchers, businesses, end-users, and institutions. Through targeted engagement, capacity-building, and mentoring activities, it fosters collaboration and knowledge exchange to unlock the region's innovation potential. **GROUNDUP** also links the Southern CEE to more advanced innovation ecosystems across Europe, helping bridge regional gaps and create a lasting impact.

This project has received funding from the European Commission
under grant agreement No.101214954

OBJECTIVES

- **Establish a Business Community:** engage tech providers, end-users, and support services like digital tech, finance, and consultancy.
- **Create an Education and Research Hub:** drive knowledge transfer, innovation, and entrepreneurship in CBRNE-related academia, bridging the gap with industry in Southern CEE.
- **Boost entrepreneurship and a business-oriented mindset:** launch a hands-on business mentoring programme.
- **Large-scale clustering, extensive communication, and dissemination efforts:** implement a robust Communication and Dissemination Plan, create a cluster of related EU projects with expert groups, and lead global outreach with stakeholders like INTERPOL, UNODC, and the EU Innovation Hub.

IMPACT

- Integration
- Knowledge Transfers
- Networking
- Upskilling & Capacity Building
